

**Mohammad Ali Taheri's complaint
Letter to the 90th principle of the
Islamic Parliament's commission**

با احترام
محمد علی تهری

2017-2018

Mohammad Ali Taheri (PhD.) is the founder of two alternative medicines known as Faradarmani and Psymmentology.

This Iranian researcher and scientist has been kept in solitary confinement in Evin prison for more than seven years while being exposed to different physical and psychological tortures.

Branch 26 of the Islamic Revolutionary Court of Tehran, chaired by Judge Ahmadzadeh in 2016 and 2017, issued two death sentences for the charge of "corruption on earth", which was violated by the Country Supreme Court both times (for various reasons, including the wording of Article 286 of the Law The Islamic Penal Code of 2012 which was enacted after he was prisoned and couldn't be applied in his case, which was the basis for the issuance of a ruling by the court of first time) and after the second violation of the death sentence in 2017, the Supreme Court sent the case to the branch office of the Islamic Revolutionary Court of Tehran (branch 15 chaired by Judge Salavati).

Judge Salavati after wasting a lot of time ultimately issued a five year sentence based on the citation of the article 286 of the Islamic Penal Code of 2012 for Mohammad Ali Taheri (PhD.). The reference to a previous article of the law which was ruled out by the Supreme Court in the two previous executions cited it for issuing the verdict against Dr. Mohammad Ali Taheri for various reasons, including the illegality of using Article 286.

Complaint 1

On December 27, 2017, and before issuing a 5 year prison sentence by Branch 15 of the Islamic Revolutionary Court of Tehran chaired by Judge Salavati for Dr. Mohammad Ali Taheri, he sent his first complaint to the 90th commission of Iranian Islamic Consultative Commission.

Complaint 2

following the failure of the Commission to investigate the first compliment letter, on April 7,

2018, after the resistance of the judge Salavati to accept his lawyers' protest against the ruling and referring the case to the Supreme Court, he sent his second complaint letter to this the commission.

Complaint 3

Lack of any response by the members of the 90th principle of Iranian Islamic Parliament Commission to him and his lawyers, and continued violations by the judge and security officials of 2-A section of Evin Prison, Dr. Mohammad Ali Taheri, was obligated to file a third complaint addressing the 90th principle of Iranian Islamic Parliament Commission to reveal further violations of the law by security officials 2-A section of Evin Prison and some of the judges who collaborate with them in the Revolutionary Court.

Complaint letters issued by Mohammad Ali Taheri (PhD) to the 90th principle of the Islamic Parliament
(First complaint)

Subject of request: Submission of complaint to the 90th principle of the Islamic Parliament

To: Honorable Prosecutor of the Evin Prison Supervisor:
Mr. Haj Moradi

With regards, further to my complaint issued on 11/12/2017, I hereby respectfully re-submit the same complaint in order to be submitted to the 90th principle of the Islamic Parliament commission in order to inform, review and further legal actions:

Honorable Iranian Islamic Parliament: Commission of 90th Principle

Upon a very brief report of the trial and review of my case in the Islamic Revolution Court, I hereby submit my complaint as follows:

- On 18/04/2010, I was put under arrest and temporary detainment by *Sarallah* intelligence officials for fabricated and unfounded charges such as being a member of the Marxist Organization of

Iranian People's Fedai Guerrillas (OIPFG) and etc. and subsequently on 04/05/2011, some new baseless charges like *spreading corruption on Earth* with regards to the legal activities of the Cultural and Arts Institution of Erfan Halgheh (Ring Mysticism) and the legal publication of books authored by myself and propagating and teaching of Erfan Halgheh as a subset of Islamic Mysticism in the above mentioned institution were added to my case which was the basis for my repeated temporary detainment that has continued to this day at the 2-A security detention facility of Evin.

- In the December of 2015, I was sentenced to death being accused of *Spreading Corruption on Earth* by misleading the people (which is a charge that can only be found in the middle ages and before the times of Socrates and such charges have been outdated for more than 2500 years and is considered obsolete and archaic); this sentence was revoked in reference to the newly ratified law in 2013 and its non-compliance with the old law which has been disaffirmed in the country's honorable supreme court (and since this accusation is in essence, a violation of the previous law and cannot be addressed with the new law, an acquittal or verdict for staying in the proceedings must have been issued for this accusation); the honorable court then requested evidence for the other accusations and since there was none, an acquittal for the

accusations (member of the Marxist Organization of Iranian People's Fedai Guerrillas, terrorism, being a threat and acting against national security, physical crimes against numerous individuals, heresy, insulting the Prophet, having numerous private plaintiffs, and etc.) was issued by the third branch of the Shahid Moqaddas court on 03/07/2016 (after many years since the charges and temporary detainment were applied).

- On the September of 2017, the 26th branch of the Revolution Court, being insistent on the same sentence as I was accused of in the past, re-issued the death sentence for the accusation of *Spreading Corruption on the Earth* through the solicitation of some of the *Sarallah* intelligence officials, which was again revoked by the Supreme Court on November 2017 for the same reasons which couldn't be affirmed due to lack of evidence. The verdict was returned to the Revolution Court for issuance by counterpart branch which through solicitation was referred to branch 15, again. At this branch, on 29/11/2017, Judge Salavati proceeded to discharge my lawyers using article 48 and stated that he intended to start the prosecution from the beginning, as if I was arrested today and informed me of my charges and put me into temporary detainment. This actions are taking place while I have been briefed of my accusation of *Spreading Corruption on the Earth* and temporary detainment about seven years ago,

and considering that this branch cannot prosecute these accusations, neither with the old law, nor with the new, and any kind of verdict regarding this accusation is illegal, according to the verdict issued with the reasons presented by the Supreme Court. It seems that this branch, in cooperation with the intelligence officials of the case and through some new provisions including the discharging of lawyers, performing a new prosecution, extending my temporary detainment at the penitentiary (in quarantine and conditions which I am fully deprived of all prisoners' rights), intends to re-issue another illegal sentence (probably the same insistent death sentence) as the previous sentences, which they hope to have approved by the Supreme Court through lobbying and solicitation.

* Therefore, according to the very brief explanations provided above, it is requested that you address my complaints regarding the flaws in legislation and not applying the purport of law in the Judiciary, explained in brief below, as soon as possible:

1. The issuance of illegal death sentences which can be considered as homicide through violation, abuse and deviation from the law and insisting on an issue which is contradictory to the law, an issue as important as the death penalty; are all clear evidence for a criminal

activity which are being conducted through the solicitation of some of the suspicious intelligence officials of *Sarallah*, through which they hope to act on their threats to hang me if I don't cooperate (by making false confessions and etc.); and or dragging me from this courtroom to that courtroom and keeping me in detainment on the false pretense of saving me from the death penalty (which is currently the case) and by re-opening my case by Judge Salavati, by discharging my lawyers which is solely based on the same previous goals and deviations from the law.

2. Illegal length of my temporary detainment, from the date of the briefing of my charges of *Spreading Corruption on the Earth* was briefed to me , my temporary detainment on 04/05/2011, has continued at the A-2 section of Evin Prison to this date (dates for the extension of the temporary detainment for the above mentioned charge include: 05/06/2011 – 12/07/2014 – 07/02/2016 – 06/04/2016 – 07/06/2016 and there has not been any order for temporary detainment issued outside of these dates); while this accusation should have been reviewed and ended and a verdict must be issued within 2 years from the date of the accusation (until 04/05/2013), but due to the fact that this accusation was non-compliant with the

old law and the intelligence officials of this case didn't intend to issue an acquittal this charge, they added time extensions so that they could use the provisions set forth in the new law ratified on 2013 to achieve the objectives of these intelligence officials by stipulating ambiguous articles like article 286, article 48 and etc. , and by making illegal references to article 286, trying to issue the death sentence and get the approval of the honorable National Supreme Court of Justice through lobbying and solicitation; a conspiracy which has not so far been successful because of the legal and principled approach of branch 33 of the justice department (Mr Niazi).

3. Illegal arrest and detainment on 18/04/2010 (without an arrest warrant) for the charges of being a member of the Organization of Iranian People's Fedai Guerrillas (which I was acquitted of on 03/07/2016); while the interrogator is not permitted to even summon an individual without having sufficient evidence (such accusations on individuals are made only for the purpose of framing and turning the case into a matter of national security and keeping individuals in special security detainment and creating fear in these individuals in order to achieve the objectives of the intelligence officials). Many efforts have been made by the intelligence

officials of this case in this regard, in order to get false dictated confessions, to charge me with the accusation of *Spreading Corruption on the Earth* by building a case on being a member of the Marxist Organization of Iranian People's Fedai Guerrillas, terrorism, threats and etc., which they could then use the old law to issue the death sentence, upon which they weren't successful. They finally tried to frame mw using *Spreading Corruption on the Earth* by "misleading people".

4. Illegal temporary detainment through the charges of *Spreading Corruption on the Earth*, heresy, insulting the Prophet and etc., on 04/05/2011; despite the non-compliance with the old law at the time of the issuance of the order of temporary detainment, the interrogator of fifth branch of Shahid Moqaddas court (Mr. Asadi) requested the opinion of three of the honorable *Marja* (authorities on jurisprudence) based on a pretense of false accusations on my behalf, and proceeded to detain me based on the *Fatwa's* (a religious verdict often issued by the authorities on jurisprudence) achieved from this false inquiry. According to the sixth article of the Supreme Court's ruling on December 2015, clearly states that in case of the existence of the law for Islamic Penal Code, citation of the opinions of *Marja's* does not have legal value.

The criminal actions of interrogator Asadi does not end here and have been explained in my complaints and letters of defense; crimes which include the submission of fifteen fabricated death sentences (instead of the three Fatwas taken from the honorable Marjas) to me, while claiming that these sentences have been issued from fifteen Marjas, and staging fake hangings by the intelligence officials of the case in order to subdue and frighten me for wresting fabricated and dictated interviews and confessions like the fabricated confession of cooperating with the US and etc.

5. Withholding the formal and legal submission of the indictment, ruling and death sentences issued by the 26th branch of the Revolution Court (years 2015 & 2017), the rulings and verdicts of the honorable national Supreme Court which had revoked the death sentences, the rulings and verdicts regarding the acquittal of the other accusations issued by the third branch of Shahid Moqaddas courthouse, and etc. I was not given the permission to read the latest ruling of the Supreme Court by Judge Salavati, claiming that the ruling can only be read and acknowledged by my lawyers and I can only be made aware of the subject of the ruling, according to the procedures practiced in the past years; I was informed that in order to

continue their activities on this case, my lawyers must receive an approval from the head of the Judiciary according to article 48, to make sure they are his trustees!!! Even on a case which has been prosecuted eight years ago and the accused is under years of temporary detainment.

6. Discharging my lawyers as mentioned above due to the newly made up article 48 and wasting the prosecution time in this regard.
7. Committing crimes, violating the prosecution code and etc. according to the descriptions set forth in the verbal and written defense, complaints issued from 2011 to this date.
8. Intentional loss of 250 pages of defense submitted on 23/04/2013 and hiding another 190 pages on November 2012 which was submitted to the court in 2016 after complaining against the intelligence official of the case (this defense was not attached to the dossier when the death sentence was issued in 2015, also in 2017).
9. Abusing and threatening my family, detaining my spouse and framing her repeatedly in order to make me into take back my complaints against the prosecutors and protesting against the imposed oppressions (which took place in different forms including sixteen hunger strikes), being unable to make necessary arrangements

to contact lawyers (because I was not able to contact my lawyers) and etc.

10. Not pursuing my repeated complaints against interrogator Asadi, the intelligence officials of the case, Judge Ahmadzadeh and Tirani and etc., by the concerned authorities since 2011 to this date.
11. Widespread propaganda for the purpose of character assassination as a cover-up for the prolonged illegal temporary detainment, issuance of illegal death sentences, justifying their criminal behavior during prosecution and violation of the criminal and prosecution code and etc, through the publishing tens of books, magazines, hundreds of articles and publishing them through the press and different media; procuring and publishing tens of video clips and films through the national media and other media and tens of television and radio programs, holding tens of conferences and etc, all of which was done before these fabrications and accusations were proven in a competent court which is an illegal act and considered *Haram* (illegal according to Islamic Jurisprudence) according to the Fatwas of the Marjas. Also, Not only they didn't allow me to respond to this accusation and defend myself, but also put a lot of pressure and arrested all

those who stood up to respond to these accusations and fabrications.

12. Not respecting the deadlines timing and order in my case in order to add or remove evidences and documents to not setting me free.

13. Many other issues have been presented in my complaints and defense which must be addressed.

*Meanwhile, the existence of some laws creates obstacles and limitations for the accused and their lawyers in order to provide the necessary defense against the accusations. Such laws are taken by legislators into consideration of special intelligence officials so that they could serve their purposes, and the legislators and the honorable Guardian Council who are probably not aware of the hidden motives and oppressive applications of such laws, ratify and approve these laws. As one of the victims of the oppressive applications of these laws who has been the target of their applications in my framed case within the past eight years, I hereby express my complaint for the approval and ratification of such legal content, for the purpose of review and appeal.

Some of these items include:

1. Certain prohibitions in receiving the formal and legal indictment, sentences and verdicts of the courts and etc. to the political-security accused and their lawyers and forcing the lawyers to resort to transcribing these sentences and prohibiting access of the accused to even hand-written copies. The accused and their lawyers can only be made aware of the results of the verdict verbally while it is being read out loud (which is normally accompanied with preposterous accusations in order to make it seem lengthy and voluminous). Most of the times, they are not given any information about the reasons for issuance of a sentence by the court, while most of the reasons for the issuance of a sentence are fabricated and framed and the accused is not able to defend himself, even if he is made aware of the reasons verbally. For example: in order to respond to the fabricated claims behind the death sentence issued in the summer of 2015, some of which I was informed through telephone communication with my spouse, I was not allowed, despite going on 70 day hunger strike and going into a coma, to defend myself. Even if the lawyers tries to respond, they accuse them of teaching their client and that a lawyer can only defend his client with consideration of the compliance of the accusations with the content of the law (even in

such a case, the smallest consideration was not made to my lawyers' defense regarding the lack of compliance of the accusation of *Spreading Corruption on the Earth* with the old and new laws, for which the death sentence was issued twice and revoked each time by the honorable National Supreme Court).

While these ploys serve as an obstruction to the accused's ability to defend himself by providing the provisions for the easy changing of evidence when required, they also serve the following purpose: not having access to any kind of legal and official evidence for referring to in the defense, not being able to respond to all of the issues mentioned in the indictment, keeping collateral from the accused for the purpose of subduing them into fulfilling the oppressive objectives of the intelligence officials of the case, not having the legal evidence required for presenting complaints and exposing the oppression and publicizing illegal content by the lawyers and many other oppressive objectives.

2. Another strange thing which cannot be found anywhere in the world and is unique to the law in Iran is that under article 48 (according to the claim made by Judge Salavati), the lawyers must be in confidence of the head of the Judiciary and receive approval from him!!!

Whereas the lawyer must be fully trusted by their clients in order to protect his legal rights and prevent extortion, bullying and illegal actions against him, instead of being trusted by the head of the Judiciary!

What is evident is that this trick is used to discharge many righteous and experienced and renowned lawyers (and closure of the bar) and replacing them with their own intelligent service lawyers who are in reality, working for the intelligence officials (special bailiffs), so that the accused are forced to choose them according to a pre-drafted list. Therefore, by using this ploy, they may prevent any kind of exposure of illegal process in the prosecution, obstruction of presenting any kind of complaint and protest to such cases, lack of attention to the complaints of the accused with regards to the violation of the prosecution code and the illegal actions of the interrogators (the intelligence officials of the case) and etc. in wresting dictated confessions, interviews and etc. giving false information to the accused according to the scenarios set by the interrogators, not feeling the need to threaten to lawyers, which has been normal practice to this day, which in many cases, the exposing of these threats would expose the objectives of those who are making the threats, not publicizing items of violation of the law and the prosecution code

against the accused. In fact, since the intelligence officials of the case are involved in the procurement of the first report and making accusations and arresting individuals, and also are involved as the plaintiff and special bailiff of the judiciary (interrogator), and they are the detainers of the accused in special detention centers (considering the fact that the verdict and sentence is issued based on their reports and the judge only signs them – based on a tape from the spokesperson of *Sarallah* officials regarding my case, which has leaked from their think tank), the only people who protect the rights of the accused, the lawyers, are removed from this process in the name of the law, so initially, a harmonious group will surround the accused in order to play out the scenario orchestrated by the officials of the case without any trouble (of course it is worth mentioning this verse from the Quran *va makaru va makarallah vallahu khairul makerin* which can be translated as “and although they plan, Allah is also planning, and Allah is the best of planners”, and this has played out many times throughout history where those in power would devise many plans, but their plans would only serve to expose their scandals).

3. Obscurity and ambiguity of some articles of the law, like article 286 of the law legislated in 2013, which is ambiguous due to the seven types of

crimes mentioned therein, and accusing individuals of these crimes is wholly related to the scenarios which are determined by the intelligence officials of the case and through this article, they may arrest and prosecute whomever they please with the highest level of accusation, and this leaves them a lot of room for abuse.

4. “Political Crime”, which has just recently been defined after many decades of silence by legislators, has diverted from its original historical route and has lowered to the level of insulting and defamation of the authorities and consequently, the sacred struggle of human beings who stand up against oppression, who are generally known as “political fighters” all around the world, is undermined. Because the label “political crime” for countries like Bahrain, Saudi Arabia, etc. would be considered standing up against and fighting oppression, while in Iran, it would be considered an insult to the authorities. Those to stand up against oppression and expose it according to their human and religious duty (which is understood from the verse of the holy Quran *“la tazlemun va la tozalemun”* (you do no wrong, nor are you wronged), especially according to the Shia teachings and the anti-oppression school of Imam Hussein); in the previous regime, these

people were called “political criminals” and the prisoner was considered as “political prisoners”. Just like how many of the figures of the Islamic Republic regime once, were themselves known as political prisoners in the previous regime (which they have referred to this in their memoirs), which is the reason why they have considered the possibility of any oppression on prisoners and political-security prisoners in Iran completely impossible and they have completely overlooked the problem. Although the law has provisioned that anyone who is faced with any kind of oppression in any way (even intelligence officials, courts and the linked entities) can file his complaint to the concerned authorities; Practically speaking it is impossible to file any complaint, the complaint would not be addressed even if it were filed and submitted (for example: the complaints which were filed by me from 2011 to this date) and even if these complaints were addressed (due to pressure from repeated protests and etc.) the perpetrators would simply be acquitted without any serious prosecution (for example: interrogator Asadi was acquitted without even having me present at the court as the plaintiff). Considering that the hearings for the political-security prisoners are largely held behind closed doors in the Islamic Revolution Court (in very

rare cases, public hearings are held in a completely theatrical and controlled manner) and the indictment, defense, verdict and sentence are all confidential and the final result of the verdict is only transcribed by the lawyers which is read out loud to the accused. Therefore, any kind of complaint by the accused and their expose's against the methods of taking confessions and interviews is not heard in the court and is suppressed with different ploys and this is one of the reasons why the prosecutors intend to use article 48 (refer to the videos of my court hearings and my revelations on their methods of getting dictated interviews and etc.). Not addressing the complaints and wiping out the problem in the long run would not only be to their disadvantage, but it will also make the Judiciary lose its credibility. Because the voices of those whom have been oppressed would one day reach other nations and suppressing the voices of the oppressed is not possible forever and It is crucial to pay attention to these matters: *“ruling people by non-believers can last, but ruling people by oppression cannot (Prophet Muhammad PBUH) - And for every nation is a [specified] term. So when their time has come, they will not remain behind an hour, nor will they precede [it].” (Holy Quran, AlAraf – 34).*

Also, there are other cases while being considered as a crime, are faced with oppressive reactions and threats including: the protesting actions by the accused like going on hunger strikes (for example: I went on hunger strike 16 times protesting to the illegal actions of the intelligence officials of my case), attempted to commit suicide (for example: I attempted suicide four times in order to avoid giving dictated and fabricated confessions and to preventing any harm to my family as a result of the threats made by the intelligence officials), peaceful protests against the illegal prosecution process, libel and spreading of false propaganda by the intelligence officials of the case which is done to get the attention of the concerned officials. But since these struggles are considered as a crime and are treated with neutrality and disinterest by the authorities, this has led to more extreme illegal reactions from the intelligence officials and the peaceful demonstrations are attacked and the protesters are arrested (while any kind of protest for any kind of event in Western countries are portrayed as resistance and struggle against oppression and tyranny by the media in Iran and any kind of reaction by the police and security forces is strongly condemned).

5. One of the biggest problems with the criminal and prosecution code about political-security

prisoners is the existence of special enforcement officers of the court or the same intelligence officials (commonly known as the experts of the case or the interrogators) who have multiple roles in the prosecution. These roles include choosing the person to be accused and preparing the preliminary report about the accused, to framing him/her, arresting and detaining, playing the role of plaintiff and also the role of court's special enforcement officer or playing the role of the interrogator and getting confessions and interviews, and getting the necessary verdict from the Revolution Courts or anything else that is necessary in the process of prosecution! In addition to playing the role of lawyer for the accused (under article 48)!!! The interesting point about these types of prosecutors is that they have their own private security prisons which are apparently under the supervision of the Prisons Organization, but in reality, they are completely independent, special and private. These are the places they detain the accused and obviously, such private locations would give them the necessary coverage to take any kind of illegal and criminal actions without leaking outside and if the accused's complaints somehow reaches the concerned courts, there is no evidence to back up these claims!

Considering the brief descriptions provided above, it is evident that with the existence of such special enforcement officers (!) who interfere in all of the stages of prosecution, and there is no authority to address their crimes and in reality, they have judicial immunity, diversion from the truth and the justice of Imam Hussein's path is inevitable, the horrendous dimensions of which will sooner or later be exposed. These types of special prosecutors (the intelligence officers of the case) identify and arrest their subjects based on a pre-meditated scenario, without holding any kind of evidence, in order to cover the topics and subjects they have constructed. Therefore, their aim is not to discover the truth of any topic or subject. To gain their goals, they must take fabricated and forced and dictated confessions from the arrested individuals and subdue them into performing interviews within this framework and through these fabricated confessions and interviews, they make films and video clips which they would then use as documented evidence to push the topic of their scenarios onto the public opinion. For example: the subject of *cultural invasion* and the extensive propaganda which has been deployed on this subject during the past decades (so they could use this as a scapegoat for the inadequacies, incompetence, inefficacy,

governmental corruption and etc.), motivates the special enforcement officers with special missions to search around for samples which would fit this description, in order to document and prove this subject to the public opinion (to attract noticeable facilities and funding, they could build a profile for themselves in this manner in order to pave their road to quick and easy success by boasting to the regime that they have identified and destroyed a deviant movement; all of the while, their actions are nothing but a blow to the regime). In the midst of all this, they have chosen “Erfan Halqeh” as an example so that through forced and dictated interviews and confessions which they intend to take from me as the founder, and by so-called documentaries and video clips, show that “Erfan Halqeh” has been founded based on the principle of *cultural invasion* and upon the request of the United States!!! This gives them the cover up to claim that we are under suppressive pressure of attacks by the enemy so it would serve as an excuse for the inadequacies and inefficiencies. If you combine this with the history of anti-mysticism in this country, they aim to persecute this branch of Islamic Erfan and its founder, while we witness the history of mysticism repeating itself in Iran.

In order to reach these goals, they subject the selected victims to various spiritual, psychological scenarios and if required, physical conditions and torture. One of the most common ploys for applying psychological pressure is threatening to arrest or abuse the family members of the accused in order to take forced confessions and interviews, which have been the most successful methods until now. A simple comparison between these people and the *Savak* is that in order to reach this goal, *Savak* interrogator would apply physical pressure on the individual so that he could confess to the truth of the matter and that they did not require fabricated confessions. But these people subdue their subjects through threats and pressure, into falsely confessing to what they say and want in the interviews. In other words, confessing to false and fabricated things. For example: the intelligence officers of the case threatened me in 2011, to either confess of having a connection with the United States and receiving the request for establishing *Erfan Halqeh* from them and hold an interview in this regard, or else they have people who could harm my wife and my children and make them orphans. A request to which I responded by attempting suicide four times in order to avoid giving false confession and also to prevent any harm to my family. An obvious

example was Mr. Mohsen Ahmadian (Petrochemical Purchase Manager), from whom they took a forced false confession in 2013 using this method (on a different subject) by telling him that there are people right now who are following his daughter in the United States (his daughter was studying in the United States at that time) and he can hear her through the phone, and if he doesn't confess to what they want from him, then they would... they then gave him the phone and he could hear his daughter over the phone, therefore, he confessed to what they wanted.

Meanwhile, cases which require the apprehension of individuals outside of the country would be approached by other illegal methods like arresting the subject's close relatives locally. For example, Mr Bahman Abadi (60 years old) who was taken hostage in 2011 (in 2-A Evin prison) so that his son who was a human rights activist living in Europe, would return to Iran and turn himself into the intelligence officials.

Also, character assassination and public image of individuals is a non-separable part of the actions taken for framing individuals. Accusations such as: having sexual affairs, acquiring illegitimate money, consuming and possession of alcoholic drinks and gambling equipment and etc.

which are aimed at destroying the public image of political-security prisoners who are not immune from these accusations? These attacks are made by framing, subduing the individual for getting fabricated confessions and interviews in this regard. Upon taking fabricated interviews and confessions, their next move is to destroy the family relations of the prisoner so that by destroying their family relations, this would isolate the prisoner so that he would be deprived from the family support who would help in his defense and coordinating with the lawyers (I personally witnessed the destruction of family relations of many prisoners in the detention facility whom had been divorced from their spouses as a result of these satanic and evil actions). In 2011, under severe pressure from the intelligence officials for falsely confessing that I had a second wife and having [this word is left blank in the original transcript] illegitimate, many attempts were made to destroy my family relations, all of which have been unsuccessful. Or on 02/07/2014 while my wife was returning home from Evin Prison after visiting me, she was arrested by 8 members of the intelligence officials of my case and was taken to our house, where they searched the house again, and since they didn't find anything to make an excuse of, they pour some alcohol in some grape juice

which they found in the refrigerator and on this pretense, they took my wife to A-2 Evin prison and detained her there for 15 days in solitary confinement so that by doing so, they could destroy her character and frame her and also to make some issues for me as well.

Another one of the ploys of these intelligence officials of the case is that for the purpose of solidifying their sentences and destroying their character, they would make films and video clips about them and by spreading lies and libel and baseless claims about the individual through the national broadcasting and other media, they **would sling mud** on the accused and in many cases, the final verdict of the court has not even been issued. These videos are sometimes made with the same fabricated confessions and interviews which were wrested from the prisoner by making threats on their close relatives and broadcasting it on the national television so that they could justify their accusations against the accused. The interesting point is that these fabrications and baseless videos and clips are played in these staged and orchestrated court hearings in order to prove the factual basis of the indictment and the issued verdict!!! Tens of these video clips and films and numerous television and radio programs were used as the reference of my indictment!!!

Also, filing complaints against the making and publishing these films and programs has not yielded any results and no court or legal authority has made any serious attempt at addressing these complaints and even when they are addressed, the court issues an acquittal upon the lobbying of these officials and etc.

To honorable 90th principle of the Iranian Islamic Parliament

(Second complaint)

Regarding my illegal arrest and detention (due to the lack of any evidence and reasons for issuing a warrant), I was charged with being a member of people's Fada'i Guerilla Organization and etc. on 18th of April 2010. Again charged with illegal arrest and detained accused of corruption on earth (due to non-compliance with the law), as well as allegations of apostasy, insulting the prophet of Islam, and etc. (due to the illegitimate citation to Islamic Marjas' verdict and the lack of any evidence to proof the accusation) on May 4th 2011, Now after about eight years, and the issuance of acquisition of the following charges: membership in people's Fada'i Guerilla Organization, the community and conspiracy to commit a crime against Country's safety, assassination, threatening people, apostasy, insulting Islam's prophet, crimes against the physical healthiness of many individuals, having multiple plaintiffs, injection of disobedience in the religious beliefs of thousands and etc. in 2016 Supreme Court abolished the death sentence issued for the "corruption on earth" two times. In December 2015 and September 2017, due to the incompatibility of the alleged accusation with the old law (which is why my arrest was illegal since the beginning or at least all charges could be annulled in 2011), and inconsistency with none of the cases referred to, in Article 286 of the new law 92, the charge of corruption on earth, and the issuance of a verdict based on newly signed law 92 which, by referring the case to a lateral court, (in line with paragraph 4 of Part B of Article 469) has to issue a verdict according to

the judgment of the Supreme Court, considering the illegitimacy of the allegations based on the aforementioned explanations , and the failure of the allegation in general, the lack of any kind of defect in the case, the lack of legality of the reference to the Marjas' fatwa, the absence of any other charges, the absence of a private plaintiff and etc. after four rounds of illegal court proceedings, an acquittal should have been issued.

Unfortunately, judge Salavati as the head of the equivalent branch, instead of casting a vote according to the judgment of the Supreme Court, indirectly dismisses my lawyers who have been working on my case for 8 years, using another prosecutor's assistance (Mr. Mohammad Hussein Sadra Alavi), forced me to accept another accusation to withdraw the previous sentence so after spending a few years more in prison, I could be released (during several meetings of the prosecutors, based on Article 498 prosecutors were forcing me to accept the "commit a crime against Country's safety" charge, which after my refusal led to the issuance of an illegal 5 more years of imprisonment based on non-compliant 286 article) by judge Salavati. Obviously, this distraintment decorated by law, is a clear criminal act and deception.

This is a deliberate way to refrain the victim from financial and moral damages appeal and rehabilitating due to

illegal arrest and detention and etc. submitting complaints against Asadi (the investigator) conduct and actions, investigators and judges of the case, Not giving back the items and goods taken from my house because I was not provided with a legal receipt, The loss of 250 pages of my defenses since early 2014, as well as the prevention of the disclosure of organized crime with suspicious purposes to politicize non-political movements, sectarianism, causing mass dissatisfaction and etc. taking away the dignity and reputation of "Sarallah" (a subdivision of revolutionary guard) by publishing massive falsehoods and plotting slanders, without sufficient supporting documents, which are based only on a few short fake short clips, fake booklets and etc. They have been able to manag their plotted criminal offenses over the last eight years.

However, after committing all these crimes, oppression, and cruelty etc. towards me and my family, now, instead of apologizing, with the utmost disgrace and timidity are still trying to plot against me and my family to save themselves from this scandal because they are being illegally supported by the law.

Therefore, considering the foregoing as an introduction, I hereby submit a complaint with the judicial authorities in Section A below for any legal proceedings (following the complaint dated Dec/30/2017, and the absence of any consideration by the Commission so far despite frequent follow ups by myself my lawyers) also referred to the review of the rules - their defects and flaws in Section B.

With regards

Mohammad Ali Taheri (Phd)

Apr. 7th 2018

Part A of the Complaints *

Investigator Asadi, investigator of the 5th branch of the “Shahid Moqaddas” Public Prosecutor's Office in 2012 (following complaints filed since 2012):

1) To take fraudulent and malicious fatwas from three Islamic Marjas by citation of false assumptions in the testimony, and attributing them to me so that they can answer referring to these assumptions, apostasy, corruption on earth, and so on. Then, on the basis of these illegitimate fatwas that were received in 2011, he took illegal measures against me, including:

(A) The issuance of my illegitimate arrest warrant for allegations of apostasy, insulting Islam’s prophet, with an unjustified, fraudulent and unlawful citation of the above fatwas and etc. According to sixth article of Supreme Court, in December 2016, since there is the Islamic Penal Code, referring to the fatwas is not legally legitimate, as a result, the issuance of my interim detention and other actions taken using this trick, was illegal since the beginning. Acquisitions for three charges were issued based on lack of evidence to the Supreme Court on July 3rd 2016.

B) The issuance of a travel prohibition imposed on me on December 21st, 2010.

(C) The issuance of some illegal sentences in the court in 2012 by judge Pir Abbasi, including the issuance of a decree for the destruction of my books, magazines, articles and cultural productions, based on fraudulent fatwas before the conclusion of the proceedings, which, as a result, the items that were collected during my arrest were transferred to deserts around Tehran and burned in front of my spouse and my **nephews** (girls: niece boy: nephew)????, and subsequently fake versions were replaced and published.

D) Cited as one of the solid reasons for issuing illegitimate death sentences on charges of “**corruption on earth in 94 and 96**” (the date must be accurate).

(E) Cited for the publication of rumors, including the citation in the film "The Devil's Ring" and its frequent broadcast through the national media and other media and etc.

2) The issuance of fifteen false sentences of execution (based on three above-mentioned decrees), with the claim that these sentences were motivated by fifteen Marjas, after studying books, magazines and articles, and examining the educational issues of my institution, and by playing these inhumane games, they tried to frighten me by fake death scenes and etc. to get fake enforced dictated confessions and etc. (while, after a long time, I was made aware through my lawyer that such executions sentences have not been signed and the

ones shown to me were forged Fatwas done by Prosecutor Asadi).

3) The issuance of an unlawful temporary arrest on charges of corruption on earth on 4th May 2011 (due to non-compliance with the law at the time).

4) Receiving a fake forced confession from me through threatening to harm my family, deception, seduction and etc. cooperating with other security officials and prosecutors of the case. The interview was also cited by Judge Piraebasi for giving sentences for several charges in 2011, and after all these my appeals have been denied.

5) Broadcasting permission for parts of the above-mentioned interview from the national TV, including the news of 20:30 on July 2012, and introducing me as a charlatan and etc. in order to gather possible private plaintiffs.

6) Illegally keeping the attributed allegations open which had to evidence to be proven (such as being a member of the People's Fada'i Guerrillas Organization and etc. which was called for an acquisition in 2016).

7) Exerting pressure and threats to obtain false confessions and accept allegations of apostasy and etc. through the same illegitimate Fatwas of Marjas taken by false accusations.

8) Abuse of Marjas political and social reputation in public and their signature in order to advance their illicit and illegitimate organized intentions.

9) Asking to leave some parts of the questioners blank and asking them verbally, and forcing to fill the sheet so that they later could write their preferred question in order to align it with their illicit intentions.

10) Preventing the appeal to the extension of my temporary detention on July 5th, 2011, on absurd excuses, false promises, seduction and deceit.

11) Violation of Article 3 of criminal penal code (CPC) and non-impartiality and cooperating with prosecutors against me.

* It should be noted according to my repeated complaints against investigator Asadi since 2011, an acquisition for Asadi's has been issued on April 7th, 2015, by Branch 15 of the 28th Tehran District Investigation Department without having been summoned as a private plaintiff to this branch. The verdict was delivered to my house instead of the detention center! Having received very difficult access to this announcement (due of the fact that it was prevented from being handed over to the detention center), despite appealing to the verdict issued on April 20th 2015, without any consideration of my appeal, the prohibition of prosecution was issued in favor of Asadi (subsequently from the branch 15 of the 28th Tehran District Investigation Department were filed on April 21st

2015, I also filed a complaint against this sentence, which has not yet been investigated).

* Mr. Judge Pirabasi (following complaints filed since 2012):

1) Acceptance and leaving the charge of corruption on earth open despite the non-compliance of the false allegations with articles 183 to 188 of the old “corruption on earth” law. The accusation of corruption on earth should have been abolished for the same reason since the beginning. Meanwhile, I and my attorney were advised at the end of the first court on October 9th 2011 and after the indictment reading, in confirmation of my lawyer's note about the foregoing law, there is no need for giving explanation on corruption on earth accusation since it is not accepted by the judge and we can spend more of our limited defense time to the rest of allegations in 50-page indictment, such as obtaining illegitimate property, and etc. (although, according to the disclosed voice recording, the judge Piraebasi was advised to order my death sentence based on corruption on earth charge. And because he did not accept it, they transferred him to the family court and replaced Judge Ahmadzadeh at the branch 26, instead of Piraebasi and threatened Ahmadzadeh that if he does not issue my death sentence, they would also exile him to the family court like judge PirAbbasi. Accordingly, he admitted issuing the death sentence twice illegally based on article 286 of the new law of corruption on earth).

2- Issuing a verdict for accusations without existence of evidence to proof them and acceptance of fake documents (fake cutoff short audio and video clips and fake booklets) without doing enough research about them on me).

3- Issuing a verdict for accusations like earning illegitimate money.

4- Not paying attention to me and my lawyers' defense, as well as the lack of consideration of my complaints regarding the misconducted acts and criminal actions undertook by investigator Asadi and case's security Officers in regard of taking false and forced dictation confessions and interviews, false sentences of executions and related scenes and the reason for my four attempts to commit suicide, violation of the Code of Civil Procedure and the rights of citizens and etc. at a court session on 22 of October 2011 (with reference to the court film)

5- The issuance of a warrant for the abolition of my books evanescence and written compilation works, cited illegally by the fatwas of the three great authorities of the Islamic Republic, which have been fraudulently taken up by investigator Asadi (the lack of legal grounds for referring to the decrees of the authorities according to the judgment of the Supreme Court in November 2015)Before the conclusion of the proceedings and providing the grounds for publishing fake books and booklets(the Institute never had a pamphlet)was filed by

case's security officers(based on evidences presented to the court on 10th July 2017)after collecting and burning the original copies in the surrounding deserts and then attach these fake copies as evidence of false and fictitious content considered in indictment and atc. In addition dismount these written compilations and etc. before reaching any certain verdict, was a clear misconduct.

6- Violation of article 3of CPC and not being neutral and cooperating with the case's security officers to the extent described above.

* Mr. Judge Ahmadzadeh)following the complaints dated 13th December 2016 – 21th February 2017 – 7th October 2017 – 30th December 2017 to 90th principle of Iranian Islamic Parliament committee :

1- Holding two sessions of the Supreme Court in 2014 and 2015 - 2016 and 2016, based on the reference to the late approval law of the year 2013(Article 286 crime of corruption on earth) and two times the issuance of the Illicit Execution Order of June 2015 and August 2017 in this regard Acts are considered as intentional murder by violating, diverting and abusing the law because:

First of all the charge against the assigned false acts with the old law(Articles 183 to 188)and the late approved law in 2013(art. 286)has not been consistent and for this

reason, the alleged charge has been substantially dismissed.

Secondly the holding of court sessions and the issuance of a verdict based on the late approved law, is without legal authority (temporary detention and interim detention: 4th May 2011)

2- Failure to comply with the votes of the Supreme Court issued in November 2015, according to paragraph 2 of Part B Article 469, following the violation of the illegal death sentence by Judge Ahmadzadeh and insisting on the reintroduction of the unlawful execution of the death sentence and failure to comply with the judgment of the Supreme Court, which is a strong reason for intentional act of murder against through a deviation from the law.

3- Conducting secret trials in order to hide the facts of the case and their illegal actions.

4- The continuation of unlawful temporary detention on charges of corruption on earth exceeds the deadline set forth in the law, which commenced on this date (violation of Article 242)

5- Citation for fake and false reasons for issuing a death sentence such as: Claiming the disclosure and seizure of two billion four hundred and seventy five million Tomans of cash belonging to me from prohibitionks throughout the country, while I only have a prohibitionk account in Tehran and my entire Financial Balance was 27 million Tomans when I was arrested.

6- Non-impartiality and cooperating with security officers in the case of character assassination and physical assassination of me by means of law and violation of article 3of CPC

7- Failure to follow up seriously my objection and complaint regarding the loss of 250 pages of my defense from the beginning of the year 2013 by the security officers of the case, which is another strong proof on collusion with security officers and undoubted determination to start murdering me is a way of violating and deviating from the law.

8- Use of hypocritical questions, use of uncanny and unprovoked and unproven criminal titles, and false labels such as: the cult, the leader of the cult, the cult of the misguided, andand etc.

9- Encourage students of my former Cultural Arts Institute and their incitement to hold peaceful protest rallies aimed at preventing illegal acts by Judge Ahmedzadeh and security officers of the case leading to arrest a large number of them and issuing long term sentences for some others.

10- Not paying attention to my remarks and protests and peaceful gatherings of people in Iran and abroad, the UN Human Rights Council, Amnesty International, the European Parliament, the prominent domestic and international personalities and circles, and etc. on holding of the illegal courts and the issuing of death sentences in this regard since 2014

11- Disregarding my complaints about the legal uncertainty of the case due to the crimes committed by security officers and the investigation of the case, violations of the rules of procedure, civil rights and etc.

Also, about taking a force dictated fake interview dictated by the use of pressure and threats to harm the family and refusing to set the minutes, the legal uncertainty of the case and the legal uncertainty of the above interview and etc.

12- Prolongation of time in the trial sessions for several years through holding illegal courts, the issuance of verdicts and illegal sentences(execution)and the lack of attention to me and my lawyers' defenses.

13- Denying the request for transfer to a public prison, receiving prisoners' rights, such as the use of leave, even after the cancelation of the death penalty in November 2015, and the issuance of a prohibition on prosecution of other charges on 3 July 2016, and on special occasions such as the funeral of my mother in law, My daughter's engagement ceremony, my mother's funeral, my daughter's wedding and etc.

14- Imposing heavy and serious mental stress on my family members and relatives by issuing verdicts and illegal sentences of execution.

His Excellency Judge Salavati

1) Failure to comply with the votes of the Supreme Court issued in November 2015 and August 2017: branch 15 as an equivalent Court, based on Article 469, paragraph 4, part B, on the nature of the charge against “Corruption on earth”, taking into account the references of the Supreme Court of Human Rights Briefly below, should have voted:

A) The incompatibility of the alleged charges with Articles 183 to 188 of the old law and Article 286 of the new law consequently, the unlawfulness of the issuance of votes and sentences.

B) Lack of legal certainty. Referring to fatwas of the Great Religious Authorities (Marjas), imitation and incompatibility of the Quranic verses based on the judgment of the court by false acts.

C) The absence of any other charges and prohibition on prosecution of other defective charges in the judgment of November 2015 of the Honorable Court, the absence of a private plaintiff and etc.

2) According to abovementioned items and the rejection and illegality of referring to Article 286 in the issuance of votes and sentences, it is also illegal to legally and reasonably invoke this Article (286).

However, Judge Salavati, in a statement issued on **3 March 2018** at branch 15, referred to paragraph 286, sentenced to five years' imprisonment, which also like their previous actions. Illegal verdicts and previous judges of the case lacked a legal background.

3) Violation of Article 3 of criminal procedure Code (CPC) and not taking into account the full interim detention on charges of corruption on earth: In the above-mentioned sentence, judge Salavati didn't consider my seven-year interim detention since 4th May 2011 till now, For the charge of spreading corruption on earth, He only counts the 2 years as the time of the previous interim detention, so that it can cover the violation of Article 242 of CPC and keep me in prison for three more years and this trick was applied to deny my rights from my former illegal custodial detainee.

It should be noted that the investigation of this charge has been conducted in the four rounds of proceedings and the formation of illegal court sessions from 4th May 2011.

First time: In the year 2011, in which my acquittal should have been issued, since it didn't match with the old law, while basically my interim detention was illegal. But the case has been affected by influential security agents and had been kept open.

The second time: holding court sessions in 2014 and 2015 following the announcement of the new law in 2013, with an unlawful citation to its Article 286, an illegal death sentence was issued that in September 2015, was violated by supreme court on the basis of the later approved law on mutual recognition from one hand and non-compliance with Article 286 from the other hand.

Third time: The holding of court sessions in 2016 and 2017, which was again reversed by violating, diverting and abusing the law by re-citing the Article 286, was the illegal vote (death sentence), which was again violated by the Supreme Court on September 2017.

Fourth time: holding a court session in branch 15 by judge Salavati as head of the branch office on 24th February 2018, which this time alongside the criminal acts during the past eight years (from the date of the illegal arrest on 18th April 2010), I was sentenced to five years' imprisonment on the basis of the statement of the reprobate article 286, which was the late approved law in 2013, which is illegal because of the aforementioned.

4) Violation of Article 242 of CPC and failure to comply with the quorum required for detention in temporary custody: according to this article, within two years from the date of the charge and temporary arrest for the charge of corruption on the earth, it should have been legally determined while I was in temporary custody since 4th May 2011 till now.

5) The lack of impartiality and disregarding my defense and my lawyer's defense and votes and the verdicts issued by the Supreme Court and violation of Article 3 of CPC.

6) Illegally dismissing my eight years lawyers and preventing them from entering Branch 15 from 30th October 2017. The time of filing a case in this branch on the pretext of applying Article 48 of CPC in order to

prevent lawyers from appealing to illegal actions that the branch intends to continue to violate the previous judgment of the case, as well as to prevent the disclosure of these illegal acts, while:

Firstly, Article 48 has not yet been implemented.

Secondly, it is related to the security cases that will be held in the prosecutor's office since the enforcement of this provision, while my case has undergone a preliminary course eight years ago and all the security charges brought on 3th July 2016 of the prosecution have been acquitted and filed since that date It has not been a security issue.

Thirdly, the list of lawyers authorized by the judiciary (under this article) has not yet been released.

Fourthly, this article, if executed, is unacceptable for the political-security accused and will not be because they won't choose lawyers who do not themselves know.

7) Denial of receipt of review and appeal request submitted by me until this date, whereas:

Firstly, under the unlawful citation, cited unconditionally, to the note to Article 286, which was announced to me at branch 15 by the Judge Salavati on 3th March 2018, I have written the extent of objection and review and appeal, and a complaint against him because of issuing illegal verdict.

Secondly) subsequent appeals and another objection which on 3th March 2018, 13th March 2018, 14th March

2018, 17th March 2018, 25th March 2018, 30th March 2018, 4th April 2018, I submitted to the Evin 2-A detention center and the supervisors of the Evin Prison, Mr. Rostami and Mr. Haj Moradi, who, according to the verbal statements of these individuals, all the above requests have been handed over to Branch 15.

8. The violation of Article 439 of CPC and not to submitting a receipt for my review and appeal request, which I have written in the notice of notification dated 3th March 2018 (and other written requests mentioned above), upon frequent requests, including on-demand appeals to present myself at court session on 18th March 2018 at the premises of the branch of Judge Salavati and he ignoring my request.

9) To prevent my lawyers from going to branch no. 15 to prevent the investigation of a sentence and to submit an appeal by them to this date, despite frequent visits to the Revolutionary Court and other relevant authorities to resolve this issue that Judge Salavati has to cover his illegitimate sentence and making obstacles on the way of my appeal and neutralization of the conspiracy and plot imposed by him on the way of my defense and some other political-security-ideological accused created due to the autonomy of this branch and the exclusivity of the law in his hands and cooperating with security officials. Although my lawyers have recently sent my appeals and their appeals via post, they still deny receiving any

documents from any individual, organization and authority (even from the letter I provided below).

10) The illegal detention to article 583 Islamic Penal code (IPC), due to the uncertainty of my arrest warrant in the security of 2-A of Evin prison.

11) Disagreement with my transfer to Evin public prison clause until the final settlement of the case, despite multiple written requests.

12) Prolonging the time of the hearing from 29th November 2017 (regardless of the illegal arrest and detention of several years ago), which should have been annexed to the grounds for written reasons and based on the votes of the Supreme Court in November 2015 and August 2017, the sentence Obedience to the charge of the corruption on earth and my immediate freedom.

Finally, according to the explanations provided, there is another conspiracy and plot in the course of the past eight years of unlawful and illegal detention of unlawful arrest and detention, the issuance of illicit death sentences (which is an act of murder and physical assassination through violations, deviations And abuse of the law), personality assassination and etc. is underway (as subsequently announced). It should be noted that some of the judges of the Islamic Revolutionary court, with the certainty of their legal immunity and that no authority can impeach against the Islamic Republic of Iran, they are acting in flagrant violation of the law.

*** Mr. Judge Tayrani**

- 1) Confirmation of the illegal death sentence issued on August 2017, Branch 26 (headed by Judge Ahmadzadeh) as second judge
- 2) Failure in being neutral and collaborating with security officers and violation of Article 3 of CPC.
- 3) Humiliating me in court proceedings and preventing me from giving oral defense and explanations, threatening to end the trial if I continue to explain and defend.

Part B of my Complaint

Review some of the rules, defects and flaws and abuse of those rules:

1- To investigate the issue of suicide among some political-security accused in detention centers and their causes and motives:

As I informed briefly in the previous complaint, I attempted to commit suicide at the Evin 2-A Detention Center in 2011, where I was unsuccessful four times. But my motive for committing suicide was to avoid giving false dictated confessions, and giving interviews in this case, including confessing lies in having contacts with the United States and etc. Security officers threatened to otherwise hurt my wife if I didn't cooperate. And as a result, my children will be deprived of their parents and I, who was not at all willing to provide false confessions and interviews about this, and on the other hand, could not tolerate harm to my family, the only way to put an end to this situation which was a conspiracy plotted by

security officers, was to commit suicide. Because these people played their part in creating fear and putting this threat so well and professionally that I had taken the threat quite seriously, that in case of not cooperating (the presentation of false dictated confessions), at the end, they will execute their threat.

But security officials actions that are against the law to obtain false and untrue confessions are due to the fact that more than 90% of the arrests of political-security accused is without any evidence - and are based only on scenarios designed to get these people arrested. (Such as my arrest on 29/1/2010 on charges of being a member of ‘Iranian Fadaie Guerilla organization” and etc. due to the lack of any evidence to justify the Supreme Court, according to the judgment of December 2013 of the Supreme Court, the prohibition Prosecution of allegations of membership in “ Iranian Fadaie Guerilla organization”, ‘conspiracy to commit a crime against the security of the country, the assassinations carried out, the threat of numerous individuals, apostasy, insulting the prophet, having multiple plaintiffs, crimes against the physical wellness of many, the creation of an skepticism in the religious beliefs of thousands and etc. were issued in 2013), while the interrogator without having sufficient evidence and documents does not even have the right to summon anyone let alone to arrest and detain people temporarily (Article 168 od CPC).

In fact, they initially arrest the person accused and interrogated them in question according to pre-written scenarios, then they are forced to confess according to the charges attributable to them and recorded the interviews of these confessions, they compensate the lack of sufficient evidence to issue a verdict Recruiting and arresting individuals (in collaborating with the security officers investigators).

Above mentioned important issues are only possible by the abuse of some of the legal provisions that are already foreseen to meet these goals, as well as neglecting some other articles of the law or parts of a legal provision. For example, Article 171 states: "If the accused confesses to committing a crime, his confession is valid and there is no other reason to move forward and other proofs will not be considered. Unless, with the review of the judge is on the contrary with the provisions of the confession, the court will carry out the necessary investigations and reviews, and the records and other documents stated in the confession. "According to this article, when the defendant receives a fake dictated written documents and an interview in this case, there is no need for any further evidence to indicate if the investigator has had valid evidence and legal citations, to issue a warrant for

custody and detention of the accused. Especially since the judges of the Revolutionary Court are never questioning how confessions are obtained from the accused and his interviews, and they do not seek discrepancies being discovered between the evidence and confessions.

If the accused himself also informs the judge about the manner of obtaining confessions, gratuitous and false declarations, and the relevant interview, then not only will he be ignored but also encounter judge's illegal judge statements and the prosecutor's representative. (Based on the films of my illegal court sessions in the years 2011, 2014, 2015, 2016) while usually before the court sessions, the defendant is briefed about in not proposing such cases and is threatened about talking about the interrogation process and the way it was taken. (Discuss how to interrogate and etc.)

I was threatened that my wife would be arrested if I tried to talk about false confessions in court. As a result, I filed a lawsuit in court about interrogating my spouse and daughter, the Ministry of Intelligence officials, interrogated them in an informal place in 2013 and then proceeded to arrest and imprison my wife in my solitary confinement in 2014 and afterwards, also made many cases for her and

tried to make false accusations in order to put pressure on me in this way and their criminal acts would remain confined and, if they insisted on being forced to give dictated confessions and false interviews, the lawful request of investigation of these legal documents (Article 169 of CPC) will be rejected and they will be subjected to charges of blackmail, publication of rumors. My request for minutes and the acceptance of this matter (false accusations and false confessions) was denied and all of my court records are documented as evidence.

Also, given that under Article 172 the Islamic Penal Code (IPC), in the of CPC crimes, only one confession of the accused is sufficient to establish the crime, and, according to Article 173 of IPC, denial after confession does not result in the cessation of punishment. Therefore, it is impossible to violate and deny the accused by taking false confessions dictated by the interrogators and the judges of the revolutionary court will never accept such denunciation, and they will not be in any way affected by any complaint or objection.

Although under Article 169 of CPC, confessions that are harassed, coerced, tortured or dictated are not worthy and valid, but there is a clear contradiction between Article 169 of CPC and Article 173 of CPC. It is clear that even one of the cases of confessions by force, repression and torture of the accused was found to be

invalidated by the court. While, besides me, at least several others have been confronted with force and threats, I have specifically encountered them at detention center A-2 (for example, in a previous complaint I have mentioned Mr. Mohsen Ahmadian)

In the case of being thoroughly confessed (according to Article 172 of the Criminal Penal Code) to issue sentences for political, security, and ideological accused, in addition to using force and threats, intimidation and etc. arbitrary methods are also used by deception to get the confession from the accused. For example, Asadi the investigator and security officers told me that if I confess to corruption on earth, apostasy, insulting the prophet and etc. just Once, I can repent immediately and in this case the death sentences (15 false sentences issued by the interrogator Asadi claiming to be taken from religious authorities, I would be free and it immediately becomes ineffective.

But if this deception and seduction were to become effective and I was not familiar with the law at that time (year 2011), I did not know the verdicts of the executions being a false sentence (and later, in court, through my lawyer, I realized that these sentences were fake) I would have admitted and due to this confession I had been executed so far on the basis of my explicit

confession; however, I did not even make such false confessions for the sole reason that I did not accept such allegations in my case. In this way, it is likely that many people have been deceived by this method (beyond the use of force and threats), false confessions and not only lost their lives, but also security officers have exploited these false confessions. They also assassinated their character and etc.

But in this regard, one of the most important reasons for the suicide of political, security, and ideological accused in detention centers are the invisible factors that have never been visible in the recorded videos of detention centers, but they take people to the brink of suicide and force them to do so. I will describe it here based on my own personal experience.

This important factor is in response to some individuals that threat and unconventional situations and the use of psychological torture is impractical for them and the security officials cannot get false confessions and interviews from them because and etc. These are honorable people who will never tolerate the burden of such inhuman practices that, by threatening the security of the accused family, by threatening to hurt its members, arresting and imprisoning them, taking hostages and etc.

wanting to fulfill their prescriptive scenarios, they won't accept it and they prefer bring death to a disgraceful life. They prefer death rather to be the target of a number of security officers' ominous goals.

They welcome death with open arms and courageously commit suicide to ruin the dirty plots of these dishonest men who plan to make the facts look like the way they want it. Consequently, they commit suicide with this intention in any way possible at the detention center (like myself), while the citing of security officers to the suicide film of these people does not in any way reflect what goes behind-the-scenes of these suicides and never includes the cause of such a motive in this group of accused. In fact, these types of suicides are "self-sacrifice", which is caused by exposure to threats and inhuman or degrading behaviors

In this regard, it has also been seen in some cases that inappropriate behavior and violations of the human dignity of some of the Of CPC accused have led them to suicide and to prefer death over living. For example, a very harsh behavior with one of the 40% veteran defendants with a 26-month presence in the front line of the Iran-Iraq war, Hossein Mohammadnejad Ardeshiri, who, according to him, was the third teenager to leave for

the front after the martyr Fahmidah. In the basement of Evin's interrogation room of 2-A Detention Center, while closing their hands and feet, has symbolically sexually harassed (one of the techniques of terrorizing and accusing the accused is believing that security officers are people who are doing anything and there is no belief in religion, God, the Prophet, (peace be upon him), conscience, honor, mercy, justice, and so on. Carrying out threats, insulting, committing anykind of dishonest acts, so that their threats are taken seriously, and the accused, under the influence of these inhumane acts and loses hope for the ethics and conscience of security officers and becomes less resistant, and sooner and more easily gives the fake dictated confession and interviews that they are asking for.

An example of these hideous actions have abundantly happened in Kahrizak detention center in 2009 and etc. During the few months that he was my cell mate during 28 October 2014 to 20 January 2015 he told me numerous times that after seeing these hideous behaviors and actions he has thought about suicide many times and was happy and willing to die and if he had not taken some conditions into consideration, he would have committed suicide. Moreover, he told me many times while he was intensively crying for hours: Mr. Taheri, who are we captives of? Who are these people? Where have they come from? And ...? And I was

providing some answers to him such as: These people whoever they are, have made us to realize the honor of Savak (The security officials of previous regime) officers and etc. so that their rights not get wronged as much, because, whatever inadmissible deeds that they did, at least they did not use the name of God, religion, prophet, imams and etc. for their material goals, power, exclusivity and etc. and in addition they did not also ask anyone to provide false and unreal confessions according to their predefined scenarios and to do false interviews and etc. What seemed to break this man is that this heartbroken veteran was always recalling with indescribable sorrow and grief that when he had explained to the security officers that he has gone to the war in his teen (in 13 and being the third teenage after martyr Fahmideh) they have told him that he had gone to the war for that bad deeds he had done (dirty and filthy vilification) and....

One of the other tricks for getting false and dictated confessions from the PSB subjects, is to arrest them in a way that be more like a hostage situation in the beginning rather than an arrest by law representatives.

One of the other tricks for getting false and dictated confessions from the of CPC accused is to arrest them in a way that is more like a hostage situation in the

beginning rather than an arrest by law representatives. After arresting, these subjects will be transferred to a safe house with blindfolds, will be subject to very special tricks, asked to confess and interview based on what they are told in exchange for their freedom. And since the hostage doesn't think they are legal agents (acting like criminals and taking them to safe houses) and believe this is an amateur hostage situation makes them not to take those confessions too seriously and cooperate in order to gain freedom in exchange for the confession. After preparation and practicing they write down the confessions and take part in the video interviews. After they are done with this process, instead of honoring their promise, they transfer them blindfolded to detention center and deliver them to another team of security agents. The new team having all those confessions and interviews in hand, confront him and doesn't accept his explanation and the method that was used for those confessions and pretend such things are not possible and he will be told that he wants to deny them after confession (And according to Article 173 denial after confession is not acceptable) and in this way, the subject is induced that he wants to play a role and roorback. I have met a person in detention center with the exact same experience, but I am not allowed to say his name. Also I have the same experience of being interrogated in a safe house.

Thus, based on the above mentioned explanations, to prevent such suicides, there should be arrangements in the law and law enforcement like:

-In precise execution of the article 168 od CPC, when an interrogator is issuing the temporary custody and warrant for the political-security-ideological accused, all the documents that are being used (before interrogation process performed by security officers) should be submitted to secret computerized secretariat of security prosecutor based on the dates and in a clear and documented way to prove that these documents has been available when arresting that person.

It should be noted that the arrest of most defendants was done without any warrant or showing any ID card of the security agents and solely with the use of force and after arrest and legal proceedings and temporary custody issuance will be sent to interrogator. Like my arrest on 18th April 2010 without any warrant and etc. for charges without a legal ground which prohibition of prosecution was issued on 3th July 2016 with the intention of taking my confession through a forced self-confession and closing the case? So this way under pressure and threats many of defendants are forced to false self-confessions and people like Late Sattar Beheshti that did not give up to these in-human acts through additional pressure and physical torture will be murdered accidentally or an honorable person like Prof. Kavvoos Seyed Emami preferred to commit suicide rather than living with this

disgusting false self-confessions and causing damage to their families coming from in-human threats from security agents<May their soul rest in peace>

Without a doubt if their interrogators are asked to provide documents on which they issued the warrant and temporary custody, they don't have any documents acceptable by international legal institutes or even ordinary people to justify their impartiality and they have acted according to security agents orders and their hope has been only on acquiring these false forced dictated confessions and only have issued the warrant based on pre-planned scenarios.

- Arrangements should be made in order to ensure that only self-confession of the political-security-ideological accused due to lack of legal validity of documents to proof the warrant, when issuing an interim detention order, and admitting the crime must only be presented I presence of the judge and in court (especially public) and also in the presence of the lawyer or lawyers of the defendants should have legally basis (because if the interrogation videos of the political-security-ideological defendants , especially those who committed suicide, would be subject to a review, we would see fear and panic, Family threats and various pressures by security officers to file false confessions for sure.)

- Official, public and legal of indictment, votes and court verdicts, as well as the publicity of the defendants'

defense of the political-security-ideological accused - beside those containing classified and confidential content, or lack of integrity) and their attorneys to prevent misuse. Commonly, such as the lack of access of defendants and lawyers to legal documents to lodge complaints of violations of the rules of procedure and civil rights, violations of the Islamic Penal Code, and violations and deviations from it (such as what I have often encountered in all of the above cases) and etc. because although the law provides laws to complain against all officials and judicial authorities in the Code of Conduct, when However, the defendants (political-security-ideological) are not able to deliver their complaints to the authorities and, if they do so, they and their lawyers will be provided with official and legal documents issued by the branches of the Revolutionary Court to present and prove their claim. , And the investigations and inquiries of these authorities do not result in a conclusion that has led to the censure of the judicial authorities of the Revolutionary Court and security officers (for example: my complaints have not been followed since 2011 till now and continuing the complaint scheme, including this complaint, is based solely on the human and religious duty, As well as these reports, at least somewhere to be recorded.)

- Providing evidence to support claims in the indictment: since, as a rule, at the beginning of the court hearing, the indictment was read out by the prosecutor's representative, and the judge asks the defendant to

answer the questions, and it seems no one in the court wants to make him/her bound to provide evidence and evidence according to the allegations made in the indictment, and usually no attention is paid to the accused's denial. Subsequently, no attention has been paid to his complaints in this regard and, in many cases, to the request for the reinstatement of the political-security-ideological defendant's proceedings (these cases have been filed personally since 2011 I have experienced so far). Given that the allegations and forth claims in the indictment against the defendants (political-security-ideological) are largely impassable and lack credible documents, and, according to the above, the trial of individuals and the issuance of their conviction are based solely on self-confession. Therefore, in order to avoid this trick, proving the argumentation of the lines of subject and forth claims in the indictment is very obligatory and necessary, which can largely prevent this trick, especially since many of the documents cited in the indictment also are fake or is one of the cases that has been confirmed by the defendant by force.

- Exclusion of the law from the monopoly of security officers about political-security-ideological defendants that it is safe to say that the main provisions of the Code of Criminal Procedure and Civic Rights are being abused or not considered by security officials. For example, according to Article 64 of CPC, one of the legal aspects is to prosecute individuals according to its article T, and the confession of the accused according to the

abovementioned explanations, can easily be taken from the accused or non-compliance or failure to consider the article 4 of CPC is the "principle of innocence", according to which all are innocent unless proved otherwise in a competent and legal court. While this principle has no meaning for security officers. Also, the principle of "argument against the claimant", (onus of proof lies with the plaintiff and denial shall be supported by oath) according to which the claim is supported by the claimant and also the accused in the judicial system of the revolutionary court must prove their innocence. And the court has no responsibility to prove the crimes (who are mostly setups). Security officers who only ask questions and do not have any other profession, and if they respond, they are merely pursuing their own goals (for example: at the beginning of my interim arrest and detention on 18th April 2010, in response to my question, "according to what document have I been arrested and accusing me of these false allegations of membership in the organization of guerrillas of the Iranian Fada'i Guerilla organization and etc., confidently said that the documents were reserved and they would never make mistakes about the arrest of the people and this is the accused who should give explanation for the charges he is taken into custody for and accept and confess to whatever is dictated to him and their work is not to provide the defendant with a document and etc. And finally, in 2016, due to the request of the Supreme Court, to justify these allegations, since the absence of any

document, even a sheet of paper was not provided, The prohibition on prosecution was issued and it was found that during the time of my temporary arrest and detention, only the accusations were used as a frame for me, and these illegal acts were due to the exclusivity of the law by the security officers and the prosecutors and branches of the revolutionary court affiliated to them. They are abusing the law and, in some cases, have different tools. If taking false dictated confessions which is a great tool for them doesn't work or their illegal procedure is interfered by miraculous events (such as the intervention of the Supreme Court and etc. which prevents the issuance of unlawful sentences and votes and violates the sentences issued in violation of the law and etc. like what happened in my court which the accusation of spreading corruption on earth was violated by the Supreme Court due to lack of legal evidence and prohibition for the death sentence was issued by the Supreme court. It is evident that the arrest and detention of the interim and the sentencing and sentences were illegal, and if the obligation to give a verdict of innocence in the revolutionary court is inevitable, under the pretext of whether anyone would be tried in a revolutionary court in nature and cannot be acquitted so they will force the person to accept another lighter conviction and if they do not obey the orders, they would go for another review and appeal, they will deny receipt of this request and the application and hold the ruling of the original court issued that is suspended and there are no complaints in this

matter. (Such scenario is what has happened to me now and I and my lawyers have been dysfunctional!) Thus, and with this approach, nobody with unjustified temporary arrest and detention could be a creditor with judiciary and claim for material and moral harm.

Therefore, by issuing another illegal vote, they try to detain a person and keep him behind bars for a while longer in order to prevent him from repentance. In the event of a person's protest, the sentenced person will re-engage in new criminal and illegal acts and this process continues to be organized

2. Some tricks of frame-ups and illegal documentation:

a) transferring some parts of the activities to security services and institutes illegally covered by the law, and one of the few tricks used to framing-up and documentation, spreading rumors, fake documentation and etc. In order to provide evidence of false proof, to show the Of CPC defendants' imaginary issued indictment justifiable and well-documented, particularly the ideological group, to assign this mission to a particular private sector, including private institutions, NGOs and organizations, which are apparently private and are busy with various social, cultural and other activities, but in fact, The creators and their members are all security officers who, by receiving large budgets based on predetermined

missions, publish false propaganda, manipulation, character assassination, including the individual, the group, and etc. and In this regard, they can use all Institutions, Ministries, Voices, and all the various media facilities. Then publish rumors and fake documents, etc., which are widely used by various media, including national media (including: articles, magazines, books, films, audio clips, video, conferences, radio and television programs , Preparation of false reports and interviews with false witnesses, etc.) as solid and undeniable documentary evidence cited for filing and arresting individuals, interim detention, interrogation and obtaining false dictated confessions, issuing indictments And conviction and etc. without these documents being previously filed by a competent court (All of the above mentioned cases have been implemented on my part), which is based on the fatwas of the great religious authorities of imitation, theses actions are haram (taboo).

b) The use of counterfeit, imaginative and criminal tags before making a statement in court:

One of the common misconceptions commonly used by security officers to advance their goals is the use of criminal tags and titles before these labels and titles has been discussed in court or has even been charged or arrested due to this subject. In this regard, security officers use their labels and titles in their initial reports and inquiries to the institutions, ministries, and others

about the person is to be questioned, so that when they arrest the subject they are already indicted before the court is convicted. This scenario, while violating the principle of innocence, the civil rights and exacerbates the existential philosophy of the trial and seriously questions nature of the court. Meanwhile, in all stages of interrogation, cross-questioning and court sessions, these labels and criminal titles are used. Also, on the issue of false publishing and character assassination described above, the use of these labels and criminal titles is widely used to a degree that ensures that it has been a set in public opinion so that it is also fully considered in court. (In my case, these practices, regardless of the assignment of defamatory and false allegations of labels and criminal titles such as the head of the cult of the wicked, the witch, the jinx, the swindler, the trickster, the Satanism, the devious and etc. were sued. In my introduction and also in the reports Primary recorded in the case, false allegations of communication with foreigners, having Marxist deviant thoughts, having illegitimate links with foreign intelligent services, obtaining illegitimate property, etc., have been made before these allegations and labels have been proven in any court. However, after eight years, the allegation of all these claims has been proven, and the main charge is spreading corruption on earth is also bound to be innocent, which has been taken by criminal acts to stop its acquittal verdict.)

c) Abusing some of the great religious authorities (Marja) and scholars (Ulema):

This is one of the most common historical methods that, through the instigation of some great authorities and scholars By providing false and misleading information and false allegations and taking fatwa against prominent people, especially the mystics, scholars and socio-political subjects, they are being assassinated by a prose and filmmaker in order to finally eliminate these elites from the realm of society for their sinister political goals and etc. and to condemn the sin of these crimes to the great authorities and scholars (the use of these techniques has always been continually and repeated throughout history. And the great mystics such as the Sheikh Ishraq and **others have been slayed by them**, so that the effects of such abuses are always evident in the martyrdom of the mystics, while behind these scary and ugly scenes, there are always dominators, monopolists and etc. who have had the popularity in mystics and intellectuals who are subject to a verse from the Holy Quran that can be translated as "Whoever GOD desires will be honored" and in this regard had a divine dignity and value among the people, while they are afraid that they have to use money, force and fear to gain people's respect and therefore they attempt to defame, accuse to abuse and use them as a tool to justify the character assassination and physical assassination of these individuals in public opinion.

In this regard, you can refer to my complaints against the investigator of branch 5 of the Shahid Moqaddas Court of Evin Prison in 2010 on page 2 of this complaint. A perfect example of such abuse in the 21st century! Not in the era of past ignorance, everyone has the right to judge their action. The hideous actions that I have kept for many years under the heavy charges of apostasy, any insult and insulting the prophet Mohammed, corruption on earth and etc. and condemned the unjustly insult to the saints kept and has repeatedly turned to the death sentences (especially in the year 2011, citing Fifteen false sentences of execution by the Marja), and if the accuracy of the divine views and opinions of the members of the Supreme Court Branch 33 of Iran (headed by Mr. Mohammad Niazi) had not yet been existed, I would have been executed by now.

While it is well-established that all the charges were all completely framed which were designed and implemented with such abuses, and etc.

3. The lengthy and unreasonable duration of the interim detention period in Article 242 of the CPC:

One of the factors that makes serious misconduct on OF CPC (P.S.I) defendants is the lengthy time of interim detention, which is set at 2 years for sentences of life (of course, this is not the case in practice, so that this period

is for the charge of corruption on earth for seven years for me And no authority has ever addressed my numerous complaints over the years) and this has provided itself with the necessary and sufficient opportunity to apply unconventional practices by security officers to the P.S.I. defendants, including the implementation of psychological torture Resulting from imprisonment in a detention center and solitary confinement cell and etc., demolishing their lives with tricks written above, to Isolate and shrink and support this group of defendants,

Having enough time to break them and satisfy them in order to provide forced false dictated confessions and interviews in this case and etc.

Another problem is that with the prolongation of the time of interim detention in case of committing the abandonment or reduction of the sentence of imprisonment imposed the Supreme Court, and etc. accountability of the accused by the longer duration of detention Defendant or acquitted defendant, some judges of the Revolutionary Court and security officers have not filed the case and do not allow the accused to be released from detention as a creditor, and they will consider another lighter sentence for him (refer to the issue of distrait). It is not conceivable that in any place in the world, it would be easy for people to be detained for two years in temporary custody, under the conditions of security and solitary confinement, and etc. Because if

they have arrested a person with legally valid documents and sufficient evidence, within a maximum of two months, a court session should be convened and issued, but as stated above, as they arrest the majority of the defendants of (P.S.I.) Without the possession of necessary and sufficient documents, and the reliance of the security officers are on taking self-confessions (with the tactics and tricks mentioned), and it is necessary to prepare documents, and creating files.

Hence the very long periods of detention Temporary is needed, which in some cases takes much longer than what foreseen in article 242 of CPC like my case.

With the wish of divine success

Mohammad Ali Taheri

7th April 2018

Dr. Mohammad Ali Taheri's 3rd complaint Letter to the 90th principle of the Islamic Parliament's commission,

In the name of God

The Honorable 90th principle of the Iranian Islamic Parliament's commission,

With greetings and blessing.

Regarding the Complaint, issued on 30th December 2017 and 6th April 2018 and follow ups and correspondence in this regard by my lawyers and due to the fact that I haven't received any response from the honorable Commission, to remind, as well as to explain another part of the defects of the law and its non-implementation violations of the procedural rules and civil rights of the accused of Of CPC prisoners, hereby I present some information to do my humane, legal and religious duty according to my own right (you are all guardians and you are all responsible):

Section “A” Complaint file for further crimes committed by judge Salavati, Branch 15 as an equivalent court of law

1) Not respecting and obeying the verdict of the Supreme Court issued in November 2015 and August 2017 as the branch of latitude And considering in nature, pursuant to paragraph 4 (b) of Article 469, and casting a vote by ignoring the citations presented in the Supreme Court of Justice and the reissuance of an illegal sentence:

A) Failure to attribute the accusation of the “corruption on earth” with the false acts assigned to articles 183 to 188 of the old law and Article 286 of the new law of 2013.

B) The illegality of citing Article 286 of the new law 2013. The crime of corruption on earth and the issuance of votes and judgments based on this article as it is a later approved law.

Given the foregoing, an acquittal should have been issued for the alleged charge.

However, Judge Salavati continued to repeat the same violation and deviation from the law over the past eight years in a flagrant violation of the rules of law, pursuant to Article 286, and the punishment for this sentence is five years' imprisonment. , has been issued. While it is illegal for the reprobation and illegality of Article 286, besides it is illegal to cite it.

2- The violation of Article 313 of CPC:

By not fully taking into account the time of the previous interim detention and not accumulating with other charges, and taking into consideration only two years of more than seven years of interim detention on charges of corruption on earth as the main charge which began on 4th May 2011 which led to temporarily arrest.

3- Violation of Article 242 of CPC:

Due to not respecting the predefined time limit of 2 years of interim detention (which has exceeded seven years).

4- The illegal arrest currently under Article 583 of I.P.C., beside the illegal arrest of previous years.

5- Dismissal of the main attorneys on the pretext of the application of the wording of Article 48 of CPC from my eight-year-old case and wasting more time for further proceedings.

6- Failure to submit the 5 year issued verdict for appealing to the Supreme Court and sending it to the equivalent Court of review with great delay. (While prosecution of corruption on earth is subject to the

jurisdiction of the Supreme Court and the review Court has no jurisdiction), and the definitive attempt to approve an unlawful sentence issued through influence over the processing of the case and the prolongation in timing of the trial by doing so.

7- Failure to implement the release on the basis of four hundred and fifty million [Tomans] of collateral, despite the provision of bail on the 19th March 2018;

8- Liability and lack of impartiality; Prolongation of the proceedings in different ways since 29th November 2017 regardless of the past several years).

9- Deprivation from the prisoner's rights and keeping in quarantine conditions in the Evin's 2-A security detention facility and ignoring to transfer me to public prison, no visitation, etc.

10- Non-considering my defense and my lawyers defense (Mr. Seyyed Mahmoud Alizadeh Tabatabaei - Ms. Zeinab Taheri - Mr. Ahmad Khosravi

11- ...

With the wish of divine success

Mohammad Ali Taheri

26th May 2018

Part B Review of some of the legal matters, defects and flaws and abusing them and ways to violate laws by law enforcement agents.

1- Abuse of the Great religious Authorities to legitimize illegal acts committed by security officers: Security officers in *Sarallah* In the past years, in response to my objections and my questions about why they have no adherence to ethical, human, legal and other matters, I have been told explicitly that what they are doing is completely religious and on the basis of the Fatwas' that are from the authorities, and they advise that. Given that these security forces are at the forefront of fighting against the arrogance, the hypocrites, the infidels, the insurgents, the enemies of Islam, and etc. and they can deceive and use trickery and lies, and violence, cruelty, etc., and commit any crime, can they cope with it and resort to these acts and as a result, security officers have put this fatwas at the heart of their abusive acts, just like

the bitter history of the fatwa behind the scenes of chain killings, has been a terrible crime, and this is precisely the case with such a copy and with hints and tricks. Similarly, and since the authorities are unaware of how the security forces (*Sarallah*) are using these permissions as an instrumental abuses that lawmakers need to prevent such abuses by adopting the necessary legal provisions and explicitly to confront interfere of the great religious authorities for P.S.I. defendants to be withheld except in the case of Islamic kindness and the civil rights, and to deter security officers from inhumane practices.

2- Performing some heinous and ugly behaviors in order to humiliate, show power and obtain false dictated confessions by the arresting family members: Another way of getting forced dictated confessions if the threats of harming family members are not effective, they arrest them so that the accused (P.S.I.), by seeing family members at the detention center, takes the threats of security officers seriously and makes it easier to dictate and refrain from providing false forced dictated confessions. For example, with the arrest and imprisonment of one of the defendants (P.S.I.), security officers in 2011 sat the wife of the accused in front of him and sat down with them and humiliated them, asking about the most detailed marital relationship in order to show their power and demonstrate their authority, they

have forced the accused to surrender to the dictation of forced false confessions. In 2012, this person described the scenario for me as he was crying, and he was severely affected by the solemnity and ugliness of the actions and behavior of these people. In some cases, they also allegedly lied to the defendant (P.S.I.) that they have arrested a member of her family and, in case of not cooperating, harasses her. In this case, one of the women arrested in connection with the Halqeh mysticism has been told that they have arrested her daughter and is currently in jail in a solitary cell, and in case of not cooperating, she would be harassed.

3- Beating the defendants in the event of a protest against their rights: For example, in October 2016 during the telephone call, when I wanted to give my daughter explanations about my hunger strike, and that they should not worry about me, the director at the security guard 2-A (Mr. Darvish), while hanging up my phone call, attacked me suddenly and madly while I was on a hunger strike, and I had been in a coma for some days, and I had no strength at all. As a result, my left shoulder was hurt and my left hand was locked so that I could not move my hand for a while. After the attack, I was thrown into a small solitary confinement in a dry strike, and after 24 hours, after I got worse, he took me out of there. Meanwhile, I was threatened to treat me as criminals and

offenders if they continued to protest. Another example of this behavior with one of the defendants who was impaired from one leg was that he was taken blindfolded into one of the small courtyards of the detention center and, while his hands were tied to the fences, beaten up so that his knee tendon is torn off and when he was co-settled with me, he is severely suffering so inevitably he was at his own expense, treated at Baqiatollah hospital.

4- Humiliation of the accused (P.S.I.): Apart from the humiliation of this group of defendants in a variety of ways, including intimidation and insults by security officers, they try to humiliate in other indirect ways. Including the deportation of the defendants (P.S.I.) with the dress of murders and convicts to court sessions (or wherever necessary) before they were convicted in a competent court. This act, while humiliating the accused, is based on the principle that the accused is guilty and it means that the security officers don't arrest someone without guilt and the Revolutionary Court, in the same vein, does not exonerate any accused. In addition, in order to further offend the accused, he may not be bothered by the state of affairs, inappropriately and for long periods of time they send them to the court in order to appear as the vagabonds, and thus to destroy the morale of the individual in self-defense. For this purpose in 2011, without bathing for several months and doing my

hair, I was dressed in a detention center uniform that was never replaced, like Tarzan, to court sessions at Branch 26 (citing court session's films). Nutrition is also held in detention facilities like convicted offenders and criminals. While welfare facilities and restrictions (blindfolded when transferring, etc.) are much worse than the public prison, which, unfortunately, is unlawful, given that the defendant is still not convicted and his crime has not been proven.

5- Summoning to unofficial places for interrogation: Another violation of Article 168 of CPC, according to which, the summoning of the accused should only be carried out by an investigator, with sufficient proofs and evidence. But beyond that, as stated above, this article is not subject to the law in any way, but the security institutions themselves have a completely different process and without any formal procedures, some of the defendants (P.S.I.) to informal and unofficial places (some of these Places are summoned and interrogated only by a small panel on one side at the entrance under the name of the "Follow-up Committee" without any other name). Such places exist in almost all parts of the city. In this case, for example, on 14th July 2013, my wife and daughter were summoned to these places by agents who claimed to be from Ministry of information, at the intersection of Valiasr-Niayesh street (each in a separate room, surrounded by a few interrogators) and there was

no woman in the place), creating fear and panic, hitting my wife in the head and getting false forced dictated false confessions, and threatened them to be silent about this interrogation. Subsequently, I was informed of this incident by my wife and went on a hunger strike as a protest against this disgraceful act, and in response, the ministry denied any interrogations of my wife and daughter, and it was found that this act was illegal and It was criminalized by security officers in *Sarallah* (by a person named Joodi) and by my security officers (Hamid Namazi and Mohammad Reza Rahimi). The complaints made in this regard have not yet been addressed and no one is responding to them. Also in my case in 2010, for several months, I was under interrogation in a safe house No.90 (a team of officers from *Sarallah*) located opposite the northern side of the University of Tehran, after which parts of these conversations were used in the production of false clips that are distributed from various media and it is used as evidence of the appended indictment. From the fraudulent practices in this case, I have been given structured texts that I have been asked to read them out loud and comment on these texts. But after that, the audio has been used to make audio clips on their own. It is worth mentioning that from this place I have been transferred to the Evin 2-A detention center on the 4 of May, 2011. The collection of these acts and practices proves that security officers in *Sarallah* have no

adherence to Islam, law, civil rights, and are arbitrarily and criminally organized, and follow a suspicious purpose as a panel.

6- Trick of losing of my defense statement: One of the techniques of security agents, in order to prevent and disrupt the defendants' defense process in relation to the charges, is losing and defaming of their defense statements.

In this case, ninety A4 papers of my defense in one stage and fifty A4 papers in another stage were handed over to the security agent at a different level in November 92 and 250, but none was delivered to the court.

And given that without the attachment of these statements to the case, Illegal death sentence (due to non-compliance with the old and new law) was issued on July 26, 2015, this act has been an act of complicity in initiating a deliberate murder by violating, diverting and abusing the law.

It is worth mentioning that a complaint was subsequently filed by my wife in this regard against security agent (Mohammad Reza Rahimi) in 2015, which resulted in only 190 pages of my defenses being handed over to court through him in February 2017. In order to take revenge from my wife, they set her up and started documenting false accusations against her.

In this regard, also referring to paragraph 13 of the complaint and defense of Mr. Mohammad Reza Hashemi Nabi (dated on December 19, 2017), Here it is exactly cited, it is clear that this trick is a vile trick, which is almost the case for most defendants (of P.S.I), many of whom are silent about it for a variety of reasons, including being exposed to various threats.

The exact complaint in this case is as follows:

13- Only 10 pages out of 500 leaflets of interrogation papers (defenses provided) are available, and 400 pages are missing and 100 other pages are still missing?

In this case, any documents obtained during the inspection process and arresting of the defendants (of P.S.I.)

, which could lead to the accused being acquitted of the alleged charge, is in danger of being destroyed. In my case, a large number of unpublished book titles and articles that were kept on computer storage, whose release could have invalidated the absurd claims and the slander, and neutralize the plots were destroyed.

All my books, magazines, articles, and cultural products of my institution under the order of Judge Pir Abbasi before the termination of the trial in 2011 years, were burned down, in the presence of my wife and nephew by security officers (Hamid Namazi, Mohammad Reza Rahimi) in the deserts around Tehran as it was common by Mongolian tribes, Subsequently, these sources have been replaced by fake versions.

7- Character assassination, physical assassination and silent physical assassination of the accused and prisoners (of P.S.I.)

As described in complaint (1), character assassination is an inseparable part of the illegal actions of security officers against individuals (of P.S.I.). By destroying their characters, the physical removal of these people becomes unimportant in public opinion, so their name should soon be forgotten. The legal physical assassination after a personality assassination is another kind of assassination and physical removal that security officers colluded with the judges of the revolutionary court through holding custom, arbitrarily, ceremonial and demonstrative courts and the issuance of unlawful verdicts by violating, diverting and abusing the law would kill the person under the law in the name of administering justice and etc. Like starting the process of my assassination by issuing illegal verdicts of executions on charges of corruption on earth in 2015 and 2017, while all the judicial authorities, including security officers, the prosecutor, judges, prosecutors and his deputies, were fully aware of the fact as they were fully acquainted with the law. The allegation of accusation to me was compatible with the old and new law, and the issuance of death sentences for the purpose of murdering me was a violation of the law. But if they cannot eliminate the subject in any way through physical assassination, silent physical assassination would be applied. However, silent physical extermination may first be carried out according

to the discretion of the individual. Silent physical assassination is carried out in various ways, including: microbial assassination, toxic, weakened radioactive, ultrasonic waves, brain (mental, psychological, memory impairment).

In the silent physical assassination of the offenders they intend to make the P.S.I. prisoners sick which are intended for incurable disease or Irreparable mental, psychological, memory damage and etc., by ensuring that they will never be cured and will not improve, and in the near future they will die or have become completely harmless due to mental and psychological impairment and memory loss, pretending to respect the person being subjected to these assassination, they release him from jail or some of them are preserved until death in prison and supposedly treated. Therefore, by removing the person concerned, without removing the adverse effects of the assassination attempt, they implement their intentions by justifying it as an act of protecting national security and etc.

The method of carrying out these attacks is such that no one can prove that the disease or harm has been the result of such silent assassinations. Here, the purpose of the assassination is to perform various chemical and non-chemical processes on the brain, which in each case result in disturbing the mind, mental, memory, etc., and the individual is deprived of his or her abilities and capabilities and becomes an almost dumb man with a degree of severity and weakness. These measures may even be carried out under the name of medical examinations or psychiatric treatment at a health center.

For example, during a television program called "To the Truth" from the channel 3 of national Broadcasting Network in the first half of May 2014, it was announced that I was afflicted with psychological illness and I have been admitted to psychiatric hospitals for seven months for psychiatric treatment. Due to the occurrence of memory abnormalities and the occurrence of short-term memory loss, it seems that I was exposed to brain assassination in order to hurt my memory. (Considering that, based on my teaching videos at the Halqeh mysticism Institute, the Free Training of the University of Tehran and the Medical Sciences University of Iran, and etc. before the arrest, I had a good mental, psychological and physical condition and had a very good memory.

Here another case is mentioned about Mr. Mohammad Reza Hashemi Nabi, who had been my cellmate since September 13, 2017, and many offenses committed and violations of the rules of procedure that occurred to me is also true about him (Such as the dismissal of his lawyers, Ms. Shadi Halimi, Mahmoud Behzadi Rad and Nemat Ahmadi, under the pretext of applying Article 48, violation of Article 242, illegal arrest of Article 583 and etc. by Judge Salavati). Here, the description of the story of the alleged assassination attempt is exactly quoted from his defense and his complaints to Judge Salavati and his lawyers.

1-Lack of legal credibility of the case due to crimes committed by investigators and security officers ,explicit violation of the Judicial procedure code by abusing the

law of unlawful Acts, false dictated confessions, deception, interruption and disappearance of defense statements, pressure and threats, Family hostage taking, destroying the family because of cooperating with other security services, intention to cover the truth due to the lack of competence of the main expert in charge, planning on eliminating me using conspiracy ,terror and transferring me to “Amin Abad” asylum despite the issuance of bail, forced drug consumption (“Mr.M” guard officer as the witness)and the official report presented to him and “Doctor.S”(The legal expert of the Revolutionary Guard which resulted in dismissal of the Evin’s 2-A detention center head (Mr. Darwish))

5- In the first week, from 18 Nov 2016 to 24 Nov 2016 I was detained due to forced drug intake with the purpose of assassination and fear of disclosure.

Illegal arrest without a warrant on 18 Nov. 2016 to 24 Nov. 2016 has been wiped from my case altogether.

6-Another assassination attempt using forced drug consumption (witness Mr. M-Guard officer)

11- Providing a complete report with evidence of numerous measures in security incidents and frequent threats, physical torture and forced drug consumption , dispatch to the asylum that led to the dismissal of the detention center 2-A (Mr. Darwish) and the inability and disqualification of the expert in charge of the case.

Regarding the aforementioned abuses it should be noted that based on the above mentioned individual statements, once the assassination attempts were revealed and reported by the guard officer, Mr. Dervish as the Head of the detention center did not sign the documents and eliminated them. After persistent and frequent follow up, with the fear of exposing this great scandal Mr. Dervish was deposed from his position as the head of the detention center.

In this regard, an external object as large as a bean seed was found in my left ear, which seems to have been placed in my ear for several years.

in 1994, with a colorless sticky discharge, I noticed the problem in my left ear.

In 1995, I submitted a request for a medical ear rinse and was sent to Evin Prison Clinic several times. Finally the medical ear rinsing was performed on 8 Nov. 2017.

On 30 April 2018 I was dispatched to “Baqiatollah” hospital and a hard material/object was found on the eardrum which did not get out by suction

. On 7 May 2018, suction was performed again after a weekly set of ear drops and still was not successful. Finally, with the use of special tool, the object was removed from the ear. It is supposed that this object was infectious and was placed in my ear (probably in cases when I was in a coma on hunger strike and unconscious) to infect and spread into the middle ear and my brain.

Fortunately, after leaving the waste, infection and inflammation were very low.

8- Failure to register security files:

On 8 May 2018, since my lawyers were not allowed to be present in the court I requested for my case/file number in Branch 15. According to the Judge Salavati's explanations Security records are not registered anywhere and this is in obvious contrary to the Criminal Procedure Code. Of course, as it turned out, the complaints of the accused and prisoners are also not recorded (citing my complaints since 2011). Therefore, it is necessary to arrange that these arbitrary and unlawful measures are stopped and the legal registration of files, petitions and complaints of defendants and prisoners, and their follow-up process should be cleared

9- Failure to provide a receipt for the appeal and re-examination of the accused and violation of the article 439 of CPC:

One of the cases mentioned in the Code of Criminal procedure under article 439 is providing the defendants with a receipt in response to their request for appeal, reconsideration and re-examination .This has not been implemented in practice for the defendants and the court or detention center does not issue the receipt in case security agents decide to close the case in the early stages of the trial. This way they will be able to show that

the accused received the verdict and has no objection and there was no evidence against it (this is the same situation that happened to my request for reinstatement in the year 2012 by judge Salavati)

10- Forced signatures to confirm receiving of the notices and etc.:

In some cases, at the discretion of security agents P.S.I. defendants are forced to sign confirmations or statements. For example in 2011, the accused (Mr. Allamezadeh, a correspondent) was forced to sign a document which stated he's not able to provide the bail amount. In protest he stated that his father (a war veteran and a retired teacher) waited behind the Evin courtroom with the bail documents and was never allowed inside. He then stated that his father was offered to pay a bribe for the accused freedom which he did not accept and sued and etc. Another case E,GH (his name is written in abbreviation because I am not allowed to write the full name) after being imprisoned for many years realized that a 400 million Rial bail amount was set for his freedom and it was stated in his case that he was not able to cover that amount.

In these matters, preventing the objections is considered very common and typical.

11- Abusing religious sanctities:

The greatest mistake that occurred after the Islamic Revolution of Iran is undoubtedly the bonding of religious sanctities, with the existence and operation of the security forces and correlating of these forces to Allah Almighty (Like Sarallah) and the Imams.

Because in the long run, given the fact that the nature of all security forces has been almost identical throughout history and followed a specific line of action, it was justifying the means to achieve the goal.

And the goal was to determine and maintain a red line for the benefit of the ruling systems and to ensure their safety and survival, that justice is always sacrificed for this purpose, and the performance of some of the security forces of the Islamic Republic of Iran has not been the exception.

Even in some cases, through the addition of the name of the revolution, Islam and religious sacred titles and the immunities enjoyed by these covers are acted much worse than the relating people in the past.

Like what happened in the serial killings committed by people who are named the Unknown Soldiers of the Imam of Asr ("Mahdi" known as the Islam's Messiah) or what I personally saw from oppression and injustice and and etc. in the name of Sarallah in the course of the past eight which has endangered Islam and its sanctities and brought the escaped religion, whose horrible dimensions will unfold in the not-so-distant future.

Nowadays, if the pressure and control of the Guardians, the regulations of the departments and so on are eliminated, it is quite clear that the result of four decades spending on enormous material and spiritual strength, and the use of extensive national resources for Islamic propaganda, even preserving the appearance of Islam, It is very primitive and superficial, faced with a lot of challenges, and the Islamic system has not even been able to institutionalize even the most prohibitional Islamic teachings in the society and to create a suitable model for supplying the world.

In this regard, the prophecy of Imam Ali (as) in Nahj al-Balaghah is being realized that:

يأتى على الناس زمان لا يبغى فيهم من القرآن الا رسمه و من الاسلام الا اسمه و مساجدهم عامرة من البناء و خراب من الهدى و ...

A time there will come that among the people; there will be no Quran except its lines and the book and from Islam, except for its name. Their mosques at that time are in great shape in terms of construction and ruined in terms of guidance.

And that is why, if the referendum held on April 1st. 1979 and more than 98% of the people voted in favor of the establishment of the Islamic Republic of Iran, in order to bring about a happy life for themselves and their children, in the light of the justice of the school of Islam, that this would not be so, If the same referendum is held now, it is not expected by not more than 35% of the population.

(The presidential elections that people participate in due to competition is not a criterion) It is therefore suggested that it is not too late to eliminate such denominations and use common names to prevent further insulting them, so that their mistakes, more than this does not hurt the people's religion.

But the other betrayal to Islam in the Islamic religion government was abusing the name of the Imams (as) and religious sacred names, naming the squares and streets of the cities with the sacred names, which caused this sacredness to be ruined. Also, allowing names and titles of holy names to name various organizations and formations with non-religious purposes, including financial and credit institutions, many of whom have been involved in the abuse of holy names for their economic activities, and With the connections and influence behind the scenes in the framework of the law and in the eyes of all, the result of the efforts of various groups of the society is kidnapped and surprisingly repaid it to Bait al-Mal, and again this process is repeated with the use of the sacred name.

Therefore, in this regard, in general, it is suggested that any naming using the religious holy places in relation to economic, social, and civil activities, in order to prevent the name of God Almighty, the Imams (as), and etc. in order to achieve material, political, and etc. benefits, this will not continue, and the scandals of these opportunism

will be ended here, because the future will not forgive us for the depth of these catastrophes.

12- Reason for Juridical Immunity of Security officers in the Files of Defendants.

As already mentioned, no court in Islamic Iran will deal with complaints against security officers and their legal authorities (judges, etc.) (Based on complaints filed since 90).

These individuals organized, circularly and arbitrarily, for the sake of judicial immunity, ultimately reckless, plotted to conspiracy, dissolved and set up various frames for the targeted subjects (of P.S.I.), and execute these plots with the help of other relevant judicial authorities.

Reason for Juridical Immunity of the security officers of the defendants and prisoners' files (of P.S.I.) as follows:

- Tying religious sanctities with the existence and identity of security officers of the case, since the disclosure of any criminal acts, corruption and disobedience to these individuals would result in the destruction of Shiite religious sanctities and severely damaging the group's reputation. As a result, the system has to cover all these disasters and prevent any disclosure of such information (in particular, the adoption of special laws), in order to prevent such a catastrophe.

Such as the importance of Article 48 to remove the lawyers of the accused and to prevent their fair defense,

Article 380 in order to deny the formal and legal appearance of fictitious indictments, unfair judgments, and so on), To this day, by preventing the disclosure of the facts behind their outrageous attitudes, people's trust in the system is not discouraged, which in the long run is inevitable.

- Exaggerated propaganda about piety, honesty, self-sacrifice of security expert(s) that makes it possible if they commit a crime, for an All-round effort to cover their violations. This is why complaints against them are not taken into consideration.
- Preserving the reputation of the system, that has led to any kind of defects and impediments to the performance of these individuals, as an attempt by the enemies of the system, and so on.

13- Inquisition: According to Article 23 of the Constitution, the Inquisition is prohibited and nobody can be harassed by a mere belief, while many have been prosecuted for their beliefs and as having deviant beliefs have suffered various persecutions, perjury and have been personally assassinated and sentenced to jail with other criminal titles such as "insulting the sacred" at the Revolutionary Court. Indeed, inquisition and condemnation of it are carried out under other titles, the most common of which are "insulting the sacred", and for this reason, the legislator considered the title "security" and charged it with "making an attempt on internal officials" and The two

charges were brought together in the second chapter of the fifth book of the Islamic Penal Code, While these two charges are unrelated to each other, the title "making an attempt of Foreign Political Authorities" has been raised independently in the third chapter of this book. It should be noted that the law does not provide any definition of the investigation is same one's beliefs and its implications, and that which is rationally and logically considered, any inquiry into the beliefs of individuals (in order to impose sanctions and punishments, etc.) is. Security officers say that as long as people have not talked about their beliefs, they are free (that is, they are free within themselves that they want to think and have any idea), but if they want to talk about their opinions, then The propaganda has been counted and audited so as to be incompatible with the principles of Islam, in this case it will be dealt with.

While when one cannot express his thoughts, ideas and doesn't have the right for freedom of thought, freedom of expression and freedom after expressing them, he cannot judge his thoughts and is considered as a walking dead. But the main problem here is that in the case of expression of belief and thought, by distorting the material and changing it, it is falsely assumed that there is a contradiction between the principles of Islam (even if it is at the legal stage of publication of the book, in this case, police officers and security guards, using criminal codes and deviant labels, etc., in other ways, will hold the medieval inquisition courts in a different way and plan for

killing people, Just like what happened in my case and the assignment of custom allegations of apostasy, insulting the Prophet of Islam, corruption on earth, and all the other titles of the same search that has done about me.

14- Documented Lies: Security officers have an extraordinary idea in terms of character assassination and degrading someone's reputation that require a very detailed description.

For example, with the film "The Devil's Ring" directed against me and its frequent broadcast of the national media in March 1995 (as the new round of my trial began), they tried to justify the illegal trial and to justify the death penalty that was issued following the holding of this court. By fake interviews with fake witnesses, the claim of the discovery of alcoholic beverages and emblems of Satanism from the place of my life and showing them,

In order to document their false claims, while I have never had such cases, and I have not been charged with keeping alcohol based on my case, and so far I have never had a private plaintiff, Therefore, the dissemination of rumors and the making of such films, which is a definitive document proving the perpetration of these crimes by the security officers of the case, shows the disrespect and disbelief of these people to Islam or after the "suicide" of Prof. Kavoos Seied Emami, the need for

assassination of the deceased person and the environmental conservation team became more serious and continued to be as dirty as possible, by broadcasting some scenes of a movie of animal torture from some sadistic person in atrocities and Ruthlessness, throwing stones at them and etc. and killing them (which is a serious alarm to humanity), As they were like amateurs, they claimed that these criminals were among the deceased Prof. Kavoods Seied Emami's environmental team who were arrested. Of course, these people are arrested by committing crimes and, with the same arguments, have been forced to admit false confession, that they have accompanied an environmental team so that security officers can make such a false claim. Which is definitely a test of their life history, proves contrary to this claim and It is imperative that domestic and international truth-clarification teams examine the evidence of this claim to reveal the facts behind these dirty tricks to those who have no motive and political, security or ideological action and merely enter Unwanted and unexpected collisions with unexpected things in the environment are subject to these terrible aggressions.

In order to cover the principle of the story and prevent its disclosure, the group was arrested and held in the quarantine of the Evin's 2-A detention center and forced to provide false confessions so that their observations would not be disclosed, which resulted in the suicide of the late Saeed Emami and the other members of the environmental protection team have been imprisoned.

Also, in some cases, those who were arrested on charges or committing crimes, instead of the perpetrators of other incidents, are introduced and exposed to public but guided trial with the same "self-confession" to appear before the court. The public court, a short-term scene broadcast from the national media, with oral explanations from security officers from the trial and defendants' defense (!!!)To show that the arrest of the perpetrators of the crime of the incident is super-fast and that the judges are notorious, whose prominence of injustice and oppression is a well-known fact to the public like judge Abooalghasem Salavati and judge Mashaallah Ahmadzadeh justifies them as a positive role with this show.

For example, in such cases, individuals who are arrested for selling weapons, but instead of the members of Isis, are being introduced and tried, or Mr. Salas, who is supposed to be tried and convicted instead of someone else.

With the wish of Divine success

Mohamad Ali Taheri
